EDUCATION

University of Washington, Seattle

Seattle, Washington

B.S. in Electrical and Computer Engineering

GPA: 3.85/4.0

SKILLS

Tools: CAD, SolidWorks, OnShape, MicroSoft Office, Excel/Sheets.

Programming: Java, MATLAB, Python, C++ , R Studio

EXPERIENCE

Octane RC Motorsport

Seattle, Washington

Electrical lead

Aug 2025 – Present

- Designed and fabricated a remote-controlled vehicle featuring a custom PCB, gearbox, differential, suspension system, and 3D-printed chassis.
- Collaborate within a 4-person team using SolidWorks, Onshape and Kicad for iterative mechanical and pcb design.

Ultrasound Imaging and Quantitative Analysis for Liver Tumor

Seattle, Washington

Undergraduate Researcher at uWAMIT Averkiou lab

March 2025– Present

- Developed a MATLAB code to track regions of interest in ultrasound image loops and generate time–intensity curves.
- Operated measurement equipment (oscilloscope, function generator, power amplifier) for ultrasound testing, including waveform generation, triggering synchronization, signal amplification, and impedance settings .

Lower-Limb Prosthetics

Seattle, Washington

Testing engineer at LegUp Prosthetics

Oct 2024 – Present

- Conducted performance and stress testing and experimental data collection for lower-limb prosthetic prototype.
- Created CAD models and performed load simulations to evaluate mechanical integrity and safety.
- Collaborate with the design team and update models and prototypes.

Electrodeposition of Nickel Nanowires

Manhattan, NewYork

Researcher Assistant

June 2023– Sep 2023

- Synthesized nickel nanowires via electrodeposition using anodic alumina membranes and GaIn eutectic back-contacting.
- Designed and assembled an electrolytic cell with controlled oxidation–reduction ($\text{Ni}^{2+} \rightleftharpoons \text{Ni}$), followed by NaOH membrane dissolution to release nanowires.

PROJECTS

Connect Four

Seattle, Washington

- Developed a Connect Four game application in Java using oop and various data structures to manage game state, player moves and check wins.

Text Classifier

- Built a Java machine learning model that categorizes text messages using word-frequency features
- Implemented training, prediction, model evaluation, and tree serialization to save/load trained models.

Prosthetics

Surrey, BC

- Designed a lower-limb prosthetic using SolidWorks and 3D printed it with friends.
- Conduct stress tests and simulation to improve user experience.

ACTIVITIES AND LEADERSHIP

Short Track Speed Skater

Richmond, British Columbia

Richmond Olympic Oval

2009 – Present

- Ranked 12th in West Canada, 3rd in 2023 BC speed skating cup, 6th in 2023 Canadian Winter Game Trial

Duke of Edinburgh's International Award Gold Level

June 2021 - Sep 2024
